

RENIER R. TRENUELA II

SENIOR SOFTWARE ENGINEER

Full-Stack & Backend Specialist with a proven track record of architecting robust systems, optimizing workflows, and scaling high-performance enterprise applications.

CONTACT

Location

Town and Country, Burol 1,
Dasmariñas City, Cavite 4115,
Philippines

TECHNICAL SKILLS

Backend Development

PHP

Laravel (v4-v11)

CodeIgniter

WordPress

Python

C#

ASP.NET

Frontend Development

JavaScript

React.js

Vue.js

Next.js

Angular

jQuery

Mobile Development

Flutter

PROFILE

Results-driven Senior Software Engineer with 10+ years of comprehensive experience in full-stack and backend development. Proven track record of designing, optimizing, and maintaining high-performance web and mobile applications. Adept at leading cross-functional teams, mentoring junior developers, and delivering highly scalable enterprise solutions for global clients. Passionate about clean code architecture, system efficiency, and innovative problem-solving.

WORK EXPERIENCE

Senior PHP Developer

Mar 2024 – Present

30KFT • WOLLONGONG, AUSTRALIA (FULLY REMOTE)

Key Stack: PHP, Laravel 11, CodeIgniter 3, Angular, JavaScript, MySQL, Redis, Docker, AWS S3, DigitalOcean Spaces, CI/CD

- Spearheaded the engineering and development of a scalable enterprise logistics management system using CodeIgniter 3 for legacy core support and Laravel 11 for modern high-throughput APIs, greatly improving operational velocity and platform stability.
- Optimized backend databases using strategic query indexing, optimization, and Redis caching layers, significantly reducing application latency for high-volume logistics transactions.
- Implemented standard containerized microenvironments via Docker Compose, guaranteeing uniform deployment transitions and eliminating environmental discrepancies across distributed global developer teams.
- Architected secure third-party object cloud storage workflows (AWS S3, DigitalOcean Spaces) to optimize asset storage pipelines, establishing maximum data availability and fault-tolerant redundancy.

Databases & Caching

MySQL

PostgreSQL

PL/SQL

MSSQL

NoSQL

Redis

Architecture & APIs

RESTful APIs

Microservices

API Integration

Tools & Infrastructure

Docker / Compose

CI/CD Pipelines

GitHub Actions

AWS (S3)

DigitalOcean

Laravel Forge

Git

Agile / Scrum

John Reinier Saturno Voluntad

ObjectBright Inc.

Johnreiniervoluntad@gmail.com

Laravel Backend Developer

Jan 2023 – Jan 2024

CREATEAPE INC. • IRVINE, CA, USA (REMOTE / PROJECT-BASED)

Key Stack: *PHP, Laravel, React, Vue.js, JavaScript, MySQL, Redis, GitHub Actions, Laravel Forge, Stripe, Firebase, AWS, CI/CD*

- Developed and engineered highly optimized, decoupled Laravel RESTful APIs to feed client-facing single-page applications powered by Vue.js and React frontends.
- Built and maintained enterprise-grade security protocols, developing bulletproof authentication and granular authorization layers utilizing Laravel Passport and Sanctum.
- Designed highly scalable MySQL schemas, refactored problematic relational queries, and integrated Redis memory caches to supercharge overall application response times by up to 40%.
- Automated delivery lifecycles by structuring end-to-end continuous integration and deployment pipelines using GitHub Actions combined with Laravel Forge, completely streamlining code ship schedules for staging and production tiers.
- Integrated multifaceted core utilities including Stripe API for billing/payments, Firebase for reliable storage systems, and various ecosystem endpoints to anchor interoperable app behaviors.

Senior Software Engineer

May 2016 – Dec 2022

OBJECT BRIGHT INC. • MUNTINLUPA CITY, PHILIPPINES (HYBRID)

Key Stack: *PHP, Laravel, WordPress, Python, Flutter, Angular, JavaScript, PostgreSQL, PL/SQL, MySQL, Docker, VPS, Linux Shell Scripting*

- Directed the end-to-end technical lifecycle of enterprise-grade software products using Laravel, Angular, and optimized relational databases, improving client-side operational uptime and user sentiment.
- Architected decoupled modular microservices that enhanced systemic elasticity, allowing concurrent development across various internal engineering verticals.
- Leveraged asynchronous architecture by setting up Laravel Queue systems backed by Redis to manage high-volume background data batches and long-running operations.
- Developed server-side cron automation workflows and Linux shell scripts to replace manual operational protocols, recovering over 15 hours per week in developer and management bandwidth.
- Served as Scrum Master/Technical Lead within Agile loops; handled sprint orchestrations, organized rigorous code review standards, and mentored junior team members to upgrade organization-wide code quality.

Junior Software Engineer

May 2015 – May 2016

MEDILINK HEALTHCARE • MAKATI CITY, PHILIPPINES (ON-SITE)

Key Stack: *PHP, ASP.NET, C#, MySQL, MSSQL Server*

- Contributed to the core design, programming, optimization, and testing phases of mission-critical healthcare informatics and clinical administration platforms.
- Collaborated closely under senior engineering mentorship to build highly structured, HIPAA-compliant medical data management services.

| EDUCATION

Bachelor of Science in Information Technology

De La Salle University – Dasmariñas City, Philippines

Jun 2010 – Mar 2014
